

J. Martini, United States District Court Judge, United States District Court for the District of New Jersey, M.L. King Jr. Federal Bldg. & U.S. Courthouse, 50 Walnut Street, Newark 07102, for limited reargument or clarification of the Court's Order of March 22, 2004 concerning claim construction in this matter ("March 22 Order") pursuant to Local Rule 7.1(g). Specifically, MOSAID respectfully requests that the Court consider certain evidence offered by MOSAID in connection with claim construction proceedings but overlooked in the March 22 Order and accompanying Opinion of that same date. Further, MOSAID respectfully requests that the Court clarify and amend its March 22 Order in light of the overlooked extrinsic evidence by adopting the following definition of "double bootstrapping circuit" and adding that definition to the end of paragraph 2, p. 2, of the March 22 Order:

A "double bootstrapping circuit" is a boosting capacitor that provides an unregulated voltage to the drain of a self-bootstrapping NMOS transistor.

**PLEASE TAKE FURTHER NOTICE** that MOSAID will rely upon the submitted Brief and the supporting Certification of Liza M. Walsh, which attaches for the convenience of the Court, evidence previously provided to the Court but which was overlooked in the Court's March 22 Order. A proposed form of Order is also submitted.

PLEASE TAKE FURTHER NOTICE that MOSAID requests oral  
argument.

Respectfully Submitted,

By:  \_\_\_\_\_
